## RADIOLOGY NEWS

**Could imaging payments for Aduhelm patients bust Medicare?**

January 14, 2022 -- Overlooking imaging costs related to the controversial Alzheimer's disease drug aducanumab (Aduhelm) prior to its approval was a mistake that could ultimately threaten Medicare's solvency, according to an analysis published January 14 in *JAMA Health Forum*. [Read More](#)

**SNMMI warns of omicron's impact on PET/CT scans**

January 14, 2022 -- The COVID-19 omicron variant appears to cause an unusual imaging pattern on FDG-PET/CT scans in cancer patients, according to a statement released January 14 by the Society for Nuclear Imaging and Molecular Imaging (SNMMI) COVID-19 Task Force. [Read More](#)

**AI can stratify risk of COVID-19 based on chest x-rays**

January 14, 2022 -- An artificial intelligence (AI) algorithm could be utilized in low-resource settings to stratify a patient's risk of having COVID-19 based on their chest x-rays, according to research published online January 13 in *Intelligence-Based Medicine*. [Read More](#)

**Ultrasound fetal monitoring takes time for maternity nurses**

January 14, 2022 -- Using ultrasound to monitor fetal heart rates can take up a lot of time for labor and delivery nurses, according to research published January 13 in *Nursing for Women's Health*. [Read More](#)

**New USPSTF guidelines reduce CT lung screening disparities**

January 13, 2022 -- New recommendations from the U.S. Preventive Services Task Force (USPSTF) on CT lung cancer screening provide more access to screening for African Americans, according to research published January 13 in *JAMA Oncology*. [Read More](#)

**MaxQ discontinues Accipio AI software as firm switches gears**

January 13, 2022 -- Artificial intelligence (AI) software firm MaxQ is switching gears, discontinuing its Accipio line of software for detection and triage of intracranial hemorrhage and ending its involvement in the development of image analysis-based AI applications. [Read More](#)

**Whole-spine MRI uncovers abusive head trauma injuries in children**

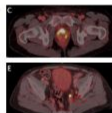

January 13, 2022 -- Performing MRI of the whole spine in young children thought to be victims of abusive head trauma can help detect injuries that may be missed on regular imaging, according to a study published January 12 in the *American Journal of Roentgenology*. [Read More](#)

**Dark-field chest x-ray measures up to CT for diagnosing emphysema**

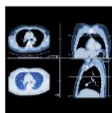

January 13, 2022 -- Dark-field chest x-ray could become an option over CT for the detection and staging of emphysema in patients with chronic obstructive pulmonary disease, according to a study published January 11 in *Radiology*. [Read More](#)

**Radiohybrid tracer superior to CT in prostate cancer imaging**

January 13, 2022 -- An experimental radiohybrid PET tracer is more effective than CT for identifying tumors prior to surgery in patients with advanced prostate cancer, according to a study published January 6 in the *Journal of Nuclear Medicine*. [Read More](#)

**Photon-counting CT improves interstitial pneumonia diagnosis**

January 12, 2022 -- Photon-counting CT improves reader confidence when it comes to diagnosing interstitial pneumonia -- and it reduces radiation dose by more than 17%, according to research presented at the recent RSNA 2021 meeting. [Read More](#)
