Our manifesto

Why the world needs algorithmic transparency

Algorithms are gatekeepers of our information.

1	Most content watched online is selected by an algorithm	⊕
2	Little is known about these algorithms...	⊕
3	...and they are not neutral	⊕

Algorithms don't have your best interest in mind.

4	Algorithms optimize for engagement over user interests	⊕
5	Algorithms can exploit human biases	⊕
6	Algorithms are being exploited by self-interested adversaries	⊕

Transparency is necessary to make algorithms trustworthy.

| 7 | Transparency is a first step towards platform accountability... | ⊕ |
| 8 | ... and towards empowering users | ⊕ |

Until platforms provide more transparency regarding the content that they amplify and its impact on civil society, we will continue to disclose what they do not.

Discover what we have accomplished

Who we are

Our team and advisors connected on aligned values and a research vision that sits at the intersection of artificial intelligence, human rights, misinformation, and policy.

Current Team

GUILLAUME CHASLOT 🐦
Guillaume did his Ph.D on AI at Maastricht University. He then worked at Microsoft and Google. He was a also a Mozilla Fellow and is an Advisor at the Center for Humane Technology. He founded AlgoTransparency to raise awareness on the impact of algorithms.
